TABERNACLE MINISTRIES

Report for Sept/Oct 2017

Greetings to one and all,

Dear friends we have now met our commitments to finish a Mexican Restaurant that I started while waiting for a new sending Church. I kept my promise and finished it and now I (we) are in full time service for the Lord. We have done some one day projects here and there but by the time you receive this letter Mel and I will be in Henderson Kentucky working on the parsonage. They are actively searching for a new Pastor and want to make sure the parsonage is up to speed for him and his family.

Once again our biggest need at the moment will be funding. We lost the majority of our funding during the time we were waiting for a new sponsoring Church. For those who hung in there during this time we want to say THANK YOU for your patience. Now is the time to come on board and become a ministering partner with us. God has always taken care of us but as you know it is through His people that this is done. If we have helped you in the past and or you have been there when others were being helped, Mel and I can now use your help. Your help enables us to help others in need.

I also would appeal to one and all to keep and eye out for a larger truck or van for the ministry. I have never owned a work van but can definitely see the advantage of having not to crawl in and out of the tailgate all the time. We have a man lined up to do lettering on the van. AMEN! We could use some one time offering on this item, please pray about this also.

Our new sponsoring Church (Beulah BC) is located in the state of Florida and yes they did get some damage in the hurricane that hit their state. We are waiting to see what their insurance carrier will cover before we make a trip down there. I pray that our sister Churches kept their insurance policies up on their facilities. Brother Brandon Rutherford is also a missionary sent out by our home Church and praise the Lord that what damage they received is cleaned up and they now have power at the writing of this report.

I have been blessed to have many people say that they like the fact that I am plain spoken and that I am the same every time they meet me. I say how I feel and I work with people to make their projects more affordable. I have never been someone who writes a sweet sounding report, no mater how hard I work at it. I try to write what is on my heart and what the need is. How can you and your Church help if you don't know the need.
